

Job Description – Software Development Engineer

Project Role: Software Development Engineer

Project Role Description: Analyze, design, code, and test multiple components of application code across one or more clients. Perform maintenance, enhancements, and/or development work.

Must Have Skills: Python (Programming Language)

Good to Have Skills: NA

Minimum Experience Required: 6 months

Educational Qualification: 15 years full-time education

Summary

As a Software Development Engineer, you will work in a dynamic environment analyzing, designing, coding, and testing application components across multiple clients. You will collaborate with team members to deliver efficient and high-quality software solutions. This role involves performing maintenance and enhancements on existing applications while ensuring client requirements are met effectively. You will also be responsible for contributing to project success through problem-solving, innovation, and technical expertise.

Roles & Responsibilities

- Independently perform tasks and gradually develop into a Subject Matter Expert (SME).
- Actively participate and contribute in team discussions.
- Provide effective solutions to work-related challenges.
- Collaborate with cross-functional teams to gather requirements and translate them into technical specifications.
- Conduct code reviews to ensure adherence to coding standards and best practices.
- Deliver high-quality, maintainable, and scalable code.

Professional & Technical Skills

- Proficiency in Python (Programming Language).
- Strong understanding of software development methodologies and practices.
- Hands-on experience with version control systems such as Git.
- Familiarity with testing frameworks and methodologies.
- Ability to troubleshoot and debug complex software issues.

Additional Information

- Minimum 6 months of relevant experience in Python development.
- This position is based at our Pune office.
- A 15 years full-time education qualification is mandatory.
